## Translation Rates

A 10% discount applies to translations over 100 pages. Rates are calculated based on either **(i) characters-count** or **(ii) double-spaced formatting**:

- (i) A characters-count (no spaces) is performed for translated text and the result is divided by 1500 to calculate the number of translated pages (i.e. each page will be made up of 1500 characters). The total number of pages is then multiplied by the corresponding rate to calculate cost;
- (ii) Translated text is formatted on A4 paper, is double-spaced, and typeset in Times New Roman 12. The total number of pages is then multiplied by the corresponding rate to calculate cost. This applies only to sworn translations. Translations to which this format applies are **marked with an asterisk (\*)**.
